SUMMARY

Creative and detail-oriented Web Developer with skills in responsive web design, frontend development, and digital marketing. Passionate about building user-friendly web applications and creating engaging digital experiences. Strong problem-solving, adaptability, and continuous learning abilities with a keen interest in modern web technologies and innovative solutions.

EDUCATION

2022-2025

84.6%

Bachelor of Science in Computer Science Madras University,
SSKV college of arts and science for women, Kanchipuram.

INTERNSHIP

Web Development & Digital Marketing - CDC IT SOLUTIONS

FEB - MAY 2026

- Developed responsive websites using HTML, CSS, JavaScript, Tailwind CSS, and WordPress
- Customized WordPress websites, themes, and UI components
- Managed SEO optimization and website content updates
- Improved website performance and mobile responsiveness
- Created social media creatives and digital marketing content
- Worked on SEO, social media marketing, and brand promotion
- Assisted in lead generation and online marketing strategies
- Collaborated with design, development, and marketing teams

Tech Associate - Pixel In

AUG - DEC 2025

- Collaborated with a team of developers to build and test features for a React-based web app.
- I collaborated closely with the UI/UX team to refine design flows and enhance accessibility across internal platforms.
- My role also involved participating in architecture diagram planning, which deepened my understanding of system design and scalability. Throughout this experience, I developed a stronger sense of design thinking and user empathy, which sharpened my decision-making and problem-solving abilities.
- Regular collaboration with cross-functional teams helped me grow as a communicator and taught me how to balance user needs with technical feasibility.

PROJECTS

GROCERY WEBSITE

- Developed a responsive grocery shopping web application using HTML, Tailwind CSS, JavaScript, Node.js, and MongoDB.
- Implemented backend features including user authentication, product management, cart functionality, and order processing.
- Integrated MongoDB for efficient database handling and dynamic CRUD operations.
- Designed a mobile-friendly and intuitive user interface following responsive design and UI/UX best practices.
- Enhanced application usability and performance to deliver a smooth and seamless shopping experience across devices.

COOK BOOK

- Developed a fully responsive recipe web application using React.js, HTML, CSS, JavaScript, and Tailwind CSS.
- Built reusable React components for recipe listings, category sections, search features, and detailed recipe pages.
- Managed application state using React Hooks for efficient dynamic rendering, filtering, and smooth user interactions.
- Designed an intuitive and visually appealing interface by applying modern UI/UX and responsive design principles.
- Optimized frontend performance and component structure to improve scalability, maintainability, and overall user experience.

CERTIFICATIONS

- **NPTEL[MHRD]Languages:** Introduction of Machine Learning
- **LIVEWIRE :** Full stack in MERN
- **GREAT LEARNING:** Machine Learning with python
